

Consulting Services

Laslett International was founded on the concept that we could significantly help and support companies and organisations with our wealth of knowledge, comprehensive capability and extensive experience.

Our strength lies in the combination of management and technical expertise that enables us to provide real-world solutions to challenging and complex projects, programmes and business issues.

Our Services include:

- **PROJECT MANAGEMENT**
- **PROGRAMME & PORTFOLIO MANAGEMENT**
- **CORPORATE SERVICES**
- **TECHNICAL & OPERATIONAL MANAGEMENT**
- **EXPERT WITNESS SERVICES**
- **PROJECT MANAGEMENT TRAINING**
- **INNOVATIVE DATA DRIVEN PROJECT MANAGEMENT**

A key focus of our services for our customers is the overall project management and delivery of projects especially those which are technically complex.

The principals of the company have a long track record of providing solutions to both business and capital projects for some of the world's largest global enterprises. Our aim is to help our customers create highly profitable returns through the successful delivery of projects and programmes.

As well as highly professional project management including exemplary project planning and scheduling we also provide safety assessments and risk management services and where required help to develop integrity management models for our customer's future processes for their production and/or operations.

PROJECT MANAGEMENT

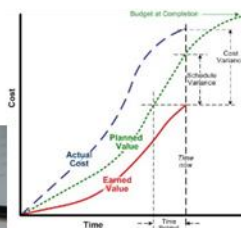

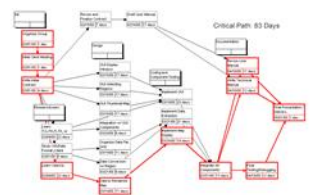

Our senior people have many years of experience in the successful delivery of major capital and business projects globally. This experience covers the complete project life-cycle from concept to commissioning.

Our project management services are built on a bed-rock of experience gained by our people in the delivery of all types and sizes of projects in many geographies.

We have a very professional and structured approach to our project management consulting services to ensure step by step agreement and performance satisfaction for every client on every assignment we undertake.

Our Services include:

- Project Management
- Project Planning & Scheduling
- Project Controls
- Contracts & Cost Engineering
- Compliance & Risk Assurance
- Procurement, Expediting & Logistics
- Project Audits
- Project Risk Management
- Project Systems & Procedures
- HSSEQ

PROGRAMME & PORTFOLIO MANAGEMENT

Programme Management

The principals at Laslett International have many years of experience in the successful delivery of programmes i.e. the co-ordinated management of projects and change management activities to achieve beneficial change in a company or organization.

Project Portfolio Management

We also have significant experience and expertise in portfolio management. Portfolio management is about selecting the right projects, adjusting the pace at which they run and adjusting their scope in order to maximise the value of the portfolio as a whole.

To fully appreciate an organisations portfolio of projects and their individual contribution to the overall strategic objectives they need to be reviewed and categorized in detail in order to build an overall profile of the portfolio and enable efficient decision making

Once a full and thorough review of the project portfolio has taken place, an organisation then needs to bring focus on its resources and how to deliver the projects. A constant challenge is ensuring that sufficient resource is available to successfully deliver the portfolio.

Programme & Portfolio Management Visualisation

At Laslett International we have developed an application (VCM Index) which can provide a clear visual structure of all the projects in a programme or portfolio together with any key linkages.

The use of a unique visual representation of the portfolio structure including all of the projects data is very beneficial to understanding the direct and indirect benefits of each project to the company.

The indexed data enables project criteria to be searched and found easily making it possible to identify and compare key data which is advantageous in programme management and the co-ordination of change.

CORPORATE SERVICES

Our senior people have a wealth of experience in successfully providing corporate support and help to global enterprises.

Our corporate support has included governance procedures, regulatory and compliance reviews, concept and feasibility studies, business risk assessments, etc.

Our work has also included M&A where we have extensive experience working throughout the full merger and/or acquisition lifecycle which means we can help in identifying all the value drivers and the dimensions critical for realising the optimum deal value.

The significant worth that we are able to add in respect to all business and capital expenditure projects comes from our unique ability to apply project management tools and techniques to the benefit of our clients in ensuring the delivery of successful initiatives.

Our Services include:

- Capital Investment Appraisals
- Due Diligence
- Corporate Risk Review
- M&A Co-ordination
- Corporate Governance
- Feasibility Studies
- Contracting Philosophy
- Business Strategy

TECHNICAL & OPERATIONAL MANAGEMENT

We provide a range of consulting and contracting services to support technical and operational management for clients involved in delivering capital projects and in operating capital plant and infrastructure.

We cover a range of industries including; offshore oil and gas, chemicals, oil refineries, shipbuilding, power generation and distribution, nuclear, pipelines, heavy construction and infrastructure, transportation, industrial process plants and renewables.

Our strength is in having people with not only technical and business experience but also expertise in both project implementation and hands-on operational management.

Our Services include:

- Engineering Management Process
- Emergency Management
- Technical Integrity Review
- Project Engineering

- Business Management Staff

A range of training courses are available including:

- Effective Project Management
- Project Management Overview
- Project Management for the Project Manager
- Project Controls
- Project Planning & Scheduling
- Estimating & Cost Control
- Risk Management

Some courses include exercises. Planning & Scheduling include use of Microsoft Project and Primavera P6 and ScheduleReader.

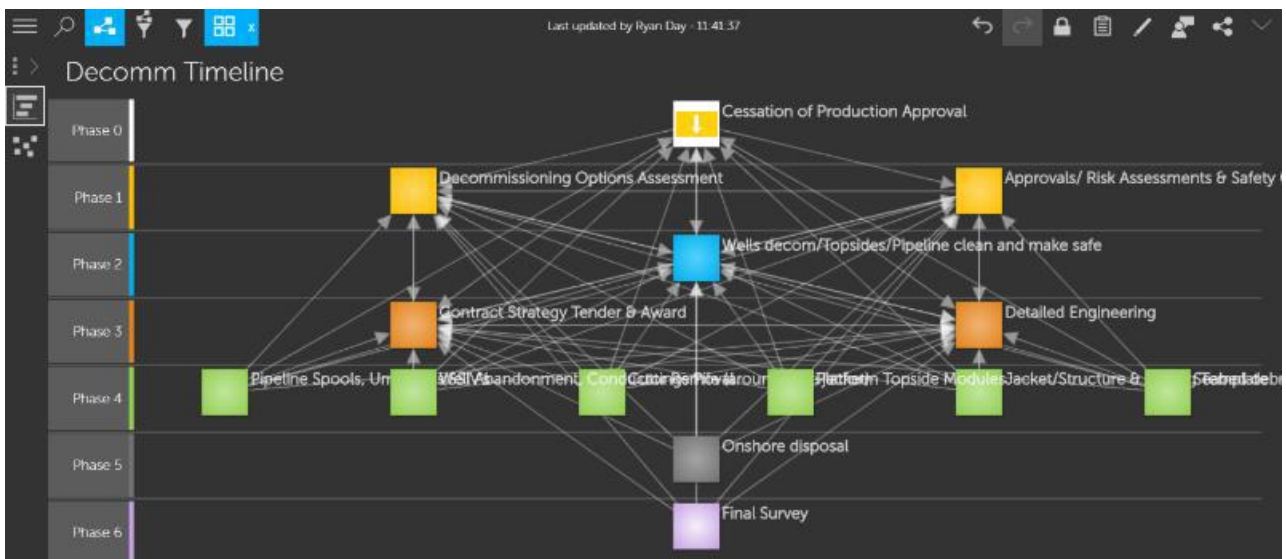

INNOVATIVE DATA DRIVEN PROJECT MANAGEMENT

At Laslett International we have developed an application (VCM Index) which provides a clear visual structure of the project together with all key linkages.

VCM Index is an innovative digital transformation application that uses visual communication of data linkages to significantly improve overall management and control of any project.

We have found that on both capital investment projects and business improvement projects that visually communicating project data and key linkages significantly helps in the management of change on a project.

VCM facilitates collaboration and enhances stakeholder communications.

Above example is a North Sea Decommissioning Project

- View project data structures that are more intuitive to navigate.
- Communicate project information using a visualisation mode.
- Indexed data enables project information to be searched and found easily.
- Secure cloud based solution enables access from any internet connection.
- Share project information and **collaborate online in real-time**

An application that provides a combination of greater project visibility through a unique blend of a visual project structure and project data linking is invaluable, it is immensely helpful in the actual delivery of projects by mitigating risk, supporting project controls and improving communication to stakeholders.

EXPERTISE IN YOUR SECTOR

Our sectoral expertise and experience includes:

➤ **Agri, Food and Life Sciences**

- Agriculture
- Dairy / Livestock, Grains & Sugar, Timber
- Processing & Supply Chain
- Science & Biology of Life

➤ **Construction and Engineering**

- Major Projects
- Engineering Schemes
- Infrastructure Projects & Utilities
- Commercial, Hotel & Leisure

➤ **Energy**

- Offshore Oil & Gas
- Power
- Renewables (Wind, Wave, Tidal, Solar, Biofuels)
- Nuclear
- Decommissioning (Offshore)

➤ **Government and Public Sector**

- Projects & Infrastructure
- Government Departments and Ministries
- Municipal Authorities
- Educational Institutions
- Procurement

➤ **Infrastructure**

- Roads
- Rail
- Airports
- Ports
- Water & Waste

➤ **Manufacturing and Industrials**

- Fabrication & Assembly
- Chemicals
- Machines & Equipment
- Industrial Production

➤ **Mining**

- Mine Development
- Processing
- Regulation & Governance
- Environmental

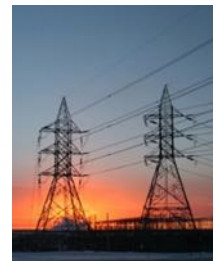

➤ **Pipelines**

- Oil & Natural Gas
- Subsea
- Tank Farms & Storage

➤ **Professional Support and Business Services**

- Outsourcing
- Shared Service Centres
- Procurement & Logistics
- M&A Programme Management
- Commercial, Regulatory and Outsourcing Transactions

➤ **Shipping**

- Shipbuilding
- Offshore Construction
- Conversions

➤ **Sport & Leisure**

- Construction of Venues
- Leisure Centres
- Event Management

➤ **Technology, Media and Telecommunications (TMT)**

- Business Expansion/Strategy Reviews
- Digital Marketing
- Big Data Analytics
- Emerging Technologies
